

Dopamine Systems in the Cingulate Gyrus: Organization, Development, and Neurotoxic Vulnerability

Michael W. Miller, Teresa A. Powrozek,
and Brent A. Vogt

Chapter contents

Goals of This Chapter 164	Role of dopamine in cell proliferation 175
Dopamine System Organization 165	Neurite outgrowth 176
Sites of origin 165	Studies of Abnormal Development 176
General organization 166	Toxin-induced monoaminergic reorganization 176
Cingulum bundle 166	Exposure to drugs of abuse: Cocaine 176
Area and laminar terminations 168	Exposure to drugs of abuse: Ethanol 178
Synaptology 170	Prenatal Ethanol Exposure: A Monkey Model 178
Dopamine Receptor Model of Cingulate-Prefrontal Information Processing 171	Dopamine-mediated Cingulate Functions, Development, and Vulnerability to Toxic Insults 179
Dopamine and COMT-Genotype Regulation of Cingulate-mediated Functions 172	Acknowledgements 181
Development of Dopaminergic Systems 173	References 181
First wave of innervation 173	
Second wave of innervation 173
