

Shared Norepinephrinergic and Cingulate Circuits, Nociceptive and Allostatic Interactions, and Models of Functional Pain and Stress Disorders

Brent A. Vogt, Gary Aston-Jones, and Leslie J. Vogt

Chapter contents

Key links between chronic pain and stress 469	Nociceptive Viscerosomatic Driving: LC, PB, MITN, Amygdala, and Cingulate Cortex 475
Reciprocal locus coeruleus–cingulate interactions 469	Norepinephrinergic Enhancement of Multiple System Processing: A Network Perspective 476
Diffuse/non-selective ‘versus’ dense/selective LC innervations 469	Amygdala: Behavioral Orienting and Conditioning 477
Rationale and Goals of this Chapter 470	Lateral Parabrachial Nucleus: VisceroSomatic Nociceptive Integration Center 479
Interactions of the sACC and LC with the HPA Axis 470	Ventrolateral Periaqueductal Gray: Coordination of Skeletomotor-Autonomic Reflexes 479
Functional Interactions of Cingulate Cortex and the LC 471	
Phasic and tonic modes of LC neuron discharges 471	
Norepinephrinergic cingulate afferents 473	
Cortical projections to LC: Top–down interactions 475
