

Cingulate Neuropathology in Anterior and Posterior Cortical Atrophies in Alzheimer's Disease

Brent A. Vogt, Leslie J. Vogt, Daniel P. Perl
and Patrick R. Hof

Chapter contents

Introduction 764

- Braak stages and cingulate cortex 764
- Statistical Analysis of Cingulate Neurodegeneration 765
- Four-region neurobiological model and AD symptoms 766

Apathy and Depression in MCI and AD: Early and Pivotal Role of Anterior Cingulate Cortex 768

Goals of This Chapter 768

Cingulate Neurodegeneration in Multiple and Progressive Subgroups 769

Multivariate Models 771

'Typical' AD with Two Poles of Cingulate Functional Impairment 772

Anterior Cortical Atrophy: ACC in Mood (Apathy), Autonomic, Executive Impairments 772

Cingulate Cortex in the Behavioral Variant of Frontotemporal Dementia 773

Methods and Case Summaries 774

Cingulate Damage in Anterior Cortical Atrophy 775

- Case 1 775
- Case 2 775
- Case 3 (FG) 775

Gross Morphology and Deposition of Marker Peptides in ACA 775

Laminar Patterns of Cingulate Neurodegeneration, Tau and Amyloid Peptides 777

- Case 1 778
- Case 3 780
- Case 2: Subcortical changes may contribute to impulsivity, verbal abuse and aggression 781
- Laminar links between neuron death and disease markers and progression 784

Posterior Cortical Atrophy and PCC in Visuospatial Impairments 786

Histopathology of Posterior Cortical Atrophy 786

Amyloid Peptides in PCA and Excess A β 43 Deposition 788

Laminar Patterns of Neurodegeneration and Marker Peptides in PCC 789

Amyloid Peptides in ACC and MCC 790

Early Visual Impairment and Cingulate Neuropathology 790

Does PCA in AD Meet the Standard for an AD Subtype? 793

Cingulate Circuitry and Damage Provide Clues for Solving the Alzheimer Puzzle 793
