

Localizing Cingulate Subregions-of-Interest in Magnetic Resonance Images Guided by Cytological Parcellations

Joseph O'Neill, Thomas L. Sobel,
and Brent A. Vogt

Chapter contents

Cingulate Parcellations in Neuron-free, Structural Images 804	Evaluating the External Subregion Limits 810
The Eight-Subregion Model 805	Voluming the Subregions 811
A Template Case with Rigorous Histology 806	Applying the Protocol to the Five Test Cases 811
Case GPC 806	Perspectives on the Cingulate SOI Voluming Method 813
Landmarks and orientation 807	Acknowledgments 816
Comments on Sulcal Variations in Relation to SOIs 808	References 816
Identifying Subregion Borders in the Rostral-Caudal (y-) Axis 809
